

SUMMARY OF FULL-STACK DEVELOPER ROLE

Restaurant Logic Jackson, MI

Job Title:

Full-Time Full-Stack Developer

Salary

Restaurant Logic is a Software-As-A-Service company that specializes in creating websites & providing a web marketing platform for the restaurant industry. We work with restaurants across Michigan, the Midwest, and are quickly expanding nationwide. We are seeking a highly motivated Full-Stack Developer to maintain current functionality of our software and build new functionality. Pay for this position is commensurate with demonstrated skill and experience.

Position Summary:

Senior Full-Stack developer responsible for maintaining and enhancing custom proprietary software package that is being used by our client base. Candidate should have 2+ years of experience with RESTful web applications and high level programming languages (Java and Node.js a plus). 3+ years of experience with relational databases (MySQL a plus). 2+ years of experience with Linux server administration/architecture. Advanced knowledge of web development languages (HTML, CSS, JavaScript).

Duties and Responsibilities:

- Trouble-shoot and fix any client reported bugs with the Production software
- Manage server solutions, including load balancing and forecasting to ensure 100% uptime at minimum viable cost.
- Estimate, plan and execute enhancements to product based on business-delivered requirements.
- Define and implement a best practices testing architecture and environment given challenges with accessing production data for testing – specifically testing social media delivery functionality without actually affecting customer's production social media environments (email, FB, Twitter etc)
- Utilize 3rd party software APIs to create operational reports for the business.
- Support the business in their process definition and enhancement through understanding of data and functional capabilities of an array of operational 3rd party software packages.

Soft Skills:

- Must be comfortable multi-tasking, and being deadline driven.
- Strong communicator – specifically pushing to fully understand requirements of the business and clearly communicate capabilities/options of various solutions.
- Must be comfortable doing independent research to identify technical software product solutions including API analysis.

- Reasonably dynamic a plus – this is still an evolving start-up company and it is not unusual for market needs to dictate shifts in direction.

Technical Skills:

- MySQL
- Java (Play framework)
- Node JS (Loopback framework)
- HTTP/RESTful experience
- HTML, CSS, and JavaScript
- LESS (a CSS framework)
- EJS files (embedded JavaScript and JavaScript templates)
- Scala
- LoopBack (Node.js framework)
- JSON
- Flyway (a 3rd -party tool used for database migration, and possibly app deployment)

WORK HOURS & SCHEDULING

This position will be required to work a minimum of 40 hours per week. Monday through Friday from 8:30am to 5:00pm. Optional flex work hours will be assessed and adjusted at an ongoing basis depending on productivity and department requirements.

SUMMARY OF COMPENSATION

Compensation:

- Base monthly salary
- A company owned laptop will be provided to assist in the above outlined job description

Vacation Time:

One week (40 hours) of paid vacation will be awarded after 60 days of employment, an additional week (40 hours) of paid vacation will be awarded after 1 year of employment.

Interested applicants should email their resume to careers@restaurant-logic.com
